<u>Grid for bonds to 10.</u>

Count out 10 red Lego bricks and 10 blue Lego bricks. Then fill in the grid in different ways; e.g. 8 red and 2 blue, 1 red and 9 blue.
This could also be done with different shapes of pasta, other toys, buttons etc. Why not try splitting into two teams, red/blue, and playing it as a game?

Grid for bonds to 20.

Count out 20 red Lego bricks and 20 blue Lego bricks. Then fill in the grid in different ways; e.g. 18 red and 2 blue, 10 red and 9 blue.
This could also be done with different shapes of pasta, other toys, buttons etc. Why not try splitting into two teams, red/blue, and playing it as a game?
